

HITECH CONSTRUCTION COMPANY LIMITED

Builders & Civil Engineers

Occupational Health and Safety Policy

Policy Statement

HITECH is committed to the highest standards of health and safety in its construction activities. It upholds ethical practices and ensures the well-being of its employees, subcontractors, and all stakeholders. This commitment is in alignment with local and international regulations, including applicable international law, IFC guidelines, ISO standards 45001 and 14001:2015, UN Guiding Principles on Business and Human Rights, UN Voluntary Principles on Security and Human Rights and Good International Industry Practice.

Objectives

- **Workplace Safety and Health:** HITECH maintains that the safety and health of its employees are paramount. It recognizes every worker's right to stop work under dangerous conditions or when facing unacceptable risks. Management will promptly address such concerns.
- **Regulatory Compliance:** HITECH continuously complies with and exceeds health, safety, and environmental regulatory requirements at national and international levels.
- **Communication:** HITECH engages and promotes open communication with all employees, subcontractors, and third parties regarding its health and safety practices and guidelines.

Implementation

- **Leadership and Responsibility:** HITECH establishes leadership responsibilities within its occupational health and safety management procedures, setting targets and standards to meet legal requirements. The company maintains the health, safety, and environmental well-being of employees, subcontractors, and third parties on company premises and project sites through robust supervision.
- **Risk Assessments and Incident Reporting:** HITECH conducts regular risk assessments to identify potential hazards and implements strategies to mitigate risks. All incidents and near misses are reported and analyzed to prevent recurrence.
- **Emergency Responsiveness and Equipment:** HITECH provides personal protective equipment (PPE) to all staff and visitors, ensures availability of first aid, and undertakes regular emergency drills to enhance preparedness.
- **Training and Awareness:** HITECH fosters ongoing awareness and training to integrate safety and health into the activities of employees, promoting a safety culture through individual and collective safety responsibilities. Toolbox talks, inductions for new recruits and visitors, and specific training on safe work procedures and emergency response are integral to maintaining a safe work environment.
- **Economic Considerations:** HITECH ensures that project timelines and economic considerations do not compromise employee health and safety.
- **Sanitary Facilities:** HITECH provides and maintains sanitary facilities on all sites to meet staff requirements and ensure hygienic conditions.
- **Documentation and Compliance:** HITECH maintains a well-documented and effective occupational health and safety management and monitoring system with applicable KPIs.
- **Permits and Licensing:** HITECH ensures all workers have the necessary permits or licenses for their roles, adhering to legal and safety requirements.

Commitment to Standards

HITECH's safety management system meets or exceeds all applicable national and international safety, health, and environmental laws and regulations. It is committed to continuous improvement and adherence to global best practices, ensuring a workplace that prioritizes the well-being of every individual associated with its operations.
