

HITECH CONSTRUCTION COMPANY LIMITED

Builders & Civil Engineers

SMOKE-FREE POLICY

HITECH, as an employer, has a legal obligation to comply with smoking regulations. This policy on smoking in the workplace applies to all employees at all levels and extends to visitors within the company's premises.

The policy on smoking in the workplace applies to all members of staff at all levels. It is the line manager's responsibility to ensure that members of staff and visitors comply with the Company's policy on smoking in the workplace within their respective areas of responsibility. It is also the responsibility of each member of staff to respect the rights of others and to adhere to this policy.

Policy Objectives

- **Legislative Compliance:** Ensure compliance with applicable smoking legislation.
- **Health Protection:** Protect non-smokers from involuntary exposure to passive smoking and establish a smoke-free environment for all staff, visitors, and customers.
- **Smoking Zones Regulation:** Clearly regulate and designate smoking areas, strictly prohibiting smoking within the confines of the workplace to ensure safety and health.

Implementation

- **No Indoor Smoking:** Smoking is not permitted within any indoor facilities of the HITECH buildings and work sites.
- **Designated Smoking Areas:** Smoking is allowed only in clearly marked designated smoking areas which are safely located away from flammable materials, fuel stations, and other hazardous areas to prevent risks of fire and contamination.
- **Cigarette Waste Management:** Provide appropriate receptacles for cigarette waste in designated smoking areas to ensure environmental cleanliness and reduce litter. Employees must dispose of cigarette butts and related waste in these designated receptacles only.

Enforcement

- **Disciplinary Actions:** Failure to comply with the smoking policy, including smoking in undesignated areas or improper disposal of cigarette waste, will be regarded as misconduct. Appropriate disciplinary action will be taken in accordance with HITECH's disciplinary procedures.
- **Managerial Responsibilities:** All managers are tasked with facilitating and monitoring the implementation of this policy effectively. They are also responsible for addressing any non-compliance among staff and visitors.
- **HR Oversight:** The Human Resources Manager will address any concerns, complaints, or questions related to the application of this policy, ensuring fair and consistent enforcement.

This policy is designed not to punish smokers but to protect and enhance the health of all employees and maintain a productive working environment. It balances the rights of individuals who choose to smoke with the need to maintain a safe and healthy workplace for all.
