

HITECH CONSTRUCTION COMPANY LIMITED

Builders & Civil Engineers

STRATEGIC ENVIRONMENTAL & SOCIAL OBJECTIVES

The Strategic Environmental & Social (E&S) Objectives set forth by HITECH are designed to guide the organization towards sustainable and responsible operations, ensuring compliance and enhancing the positive impact on communities and the environment. These objectives are established in accordance with relevant host country E&S laws and regulations, applicable international laws including conventions and treaties adopted by the host countries and international norms and standards, including the International Finance Corporation (IFC), **Equator Principles IV**, **ISO standards 45001 and 14001:2015**, **Good International Industry Practice**, the **United Nations Guiding Principles on Business and Human Rights (UNGP)** and the **Voluntary Principles on Security and Human Rights (UNVP)**. The Strategic E&S Objectives are presented below:

1. **Compliance with Legal and Regulatory Requirements:** Ensure adherence to all relevant national, international environmental and social laws, regulations, and standards.
2. **Sustainable Resource Management:** Promote the efficient use of natural resources, including energy, water, and raw materials, to reduce environmental footprints.
3. **Pollution Prevention:** Implement measures to prevent pollution, reduce emissions, and manage waste effectively, aiming for minimal environmental impact.
4. **Biodiversity Conservation:** Protect and enhance biodiversity in project areas by implementing specific measures to conserve and restore natural habitats.
5. **Community Engagement and Development:** Foster positive relationships with local communities through transparent communication, engagement activities, and support for local development initiatives.
6. **Health and Safety:** Ensure a safe and healthy working environment for all employees, contractors, and communities impacted by HITECH operations.
7. **Economic and Social Benefits:** Maximize the economic and social benefits of projects for local communities, including employment opportunities, local procurement, and livelihood restoration.
8. **Continuous Improvement:** Commit to continuous improvement in environmental and social performance through regular monitoring, auditing, and feedback mechanisms.
9. **Capacity Building:** Enhance the capacity of employees, contractors, and local stakeholders to manage environmental and social issues effectively.
10. **Climate Change Mitigation and Adaptation:** Implement strategies to mitigate climate change impacts and adapt to changing environmental conditions.

Implementation Strategy:

To achieve these objectives, HITECH will undertake the following steps:

By setting clear E&S Objectives and implementing these strategies, HITECH aims to ensure responsible and sustainable project outcomes that benefit both the environment and the communities in which it operates.
