

HITECH CONSTRUCTION COMPANY LIMITED

Builders & Civil Engineers

Human Rights Policy

HITECH Construction Company Limited ("HITECH") is committed to respecting internationally recognised human rights in its activities and business relationships. This commitment is guided by the United Nations Guiding Principles on Business and Human Rights (UNGPs), the Universal Declaration of Human Rights, the fundamental principles and rights at work recognised by the International Labour Organization (ILO), applicable Nigerian law, and additional human rights requirements expressly applicable to individual projects.

1. Scope and Commitments

This Policy applies to all HITECH employees and management. Applicable requirements shall also be communicated to and, where appropriate, incorporated into contractual arrangements with contractors, subcontractors, suppliers, consultants, security providers and other business partners.

HITECH will:

- **Respect human rights** and seek to avoid causing or contributing to adverse human rights impacts through its activities and to address such impacts where they occur.
- **Prohibit child labour, forced labour, human trafficking, modern slavery, discrimination, harassment, exploitation and retaliation**, and promote safe, healthy, fair and respectful working conditions.
- **Identify and manage human rights risks on a risk-based basis**, proportionate to the nature, scale and context of its activities and the requirements applicable to each project.
- **Engage meaningfully with affected communities and other relevant stakeholders**, with particular attention to vulnerable or disadvantaged groups, and provide information in accessible and culturally appropriate ways.
- **Maintain accessible grievance mechanisms** for workers and stakeholders, including confidential channels where appropriate, protection against retaliation and appropriate escalation and follow-up of grievances.
- **Support access to remedy** where HITECH has caused or contributed to an adverse human rights impact and cooperate appropriately where impacts are directly linked to its activities through business relationships.
- **Assess and manage security-related human rights risks.** HITECH will apply the principles of the Voluntary Principles on Security and Human Rights (VPSHR), establish appropriate conduct and use-of-force requirements for private security providers, provide proportionate training, maintain incident and grievance arrangements, and use available leverage and coordination mechanisms in its engagement with public security forces.
- **Apply risk-based human rights due diligence to contractors, suppliers and other third parties**, including appropriate contractual requirements, screening, monitoring and corrective action.
- **Monitor human rights performance** through appropriate project monitoring, grievance analysis, contractor and supplier oversight, audits or other verification measures proportionate to identified risks.

2. Accountability and Implementation

Senior Management is accountable for implementation of this Policy. Responsibility for human rights matters shall be assigned to an appropriately qualified HITECH function and, where warranted by project risk or applicable project requirements, a **Human Rights Focal Point or equivalent responsible officer** shall be designated.

Human rights requirements shall be integrated, as relevant, into HITECH's Environmental and Social Management System, human resources arrangements, stakeholder engagement, procurement and subcontractor management, security management, training, monitoring and grievance procedures.

3. Project-Specific Requirements

HITECH CONSTRUCTION COMPANY LIMITED

Builders & Civil Engineers

Where a project is subject to additional environmental, social or human rights requirements arising from financing documents, contractual commitments, an Environmental and Social Action Plan, or other formally adopted project requirements, HITECH shall identify and implement those requirements **to the extent applicable to its scope, responsibilities, control and contractual obligations**.

Such requirements may include relevant IFC Performance Standards, lender or export credit agency requirements, and project-specific human rights assessments or corrective action plans. **They do not automatically apply to other HITECH operations unless separately adopted or made applicable.**

HITECH will periodically review this Policy in light of material changes in legal requirements, project risks, audit findings, lessons learned and applicable financing commitments.
